DETAILED ACTION

Priority

1. Receipt is acknowledged of a certified copy of the Swedish application. If this copy is being filed to obtain the benefits of the foreign filing date under 35 U.S.C. 119(a)-(d), applicant should also file a claim for such priority as required by 35 U.S.C. 119(b) **in the oath or declaration or in an application data sheet.** If the application being examined is an original application filed under 35 U.S.C. 111(a) (other than a design application) on or after November 29, 2000, the claim for priority must be presented during the pendency of the application, and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior foreign application. See 37 CFR 1.55(a)(1)(i). If the application being examined has entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the claim for priority must be made during the pendency of the application and within the time limit set forth in the PCT and Regulations of the PCT. See 37 CFR 1.55(a)(1)(ii). Any claim for priority under 35 U.S.C. 119(a)-(d) or (f) or 365(a) or (b) not presented within the time period set forth in 37 CFR 1.55(a)(1) is considered to have been waived. If a claim for foreign priority is presented after the time period set forth in 37 CFR 1.55(a)(1), the claim may be accepted if the claim properly identifies the prior foreign application and is accompanied by a grantable petition to accept an unintentionally delayed claim for priority. See 37 CFR 1.55(c).

The priority is not claimed in the oath or declaration or in an application data sheet of the instant application. Appropriate correction is required.

Oath/Declaration

2. Receipt is acknowledged of papers filed under 35 U.S.C. 119 (a)-(d) based on an application filed in Sweden on 11 December 2003. Applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of any foreign application. A new oath, declaration or application data sheet is required in the body of which the present application should be identified by application number and filing date.

Specification

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, **as a section heading**.

(a) TITLE OF THE INVENTION.

(b) CROSS-REFERENCE TO RELATED APPLICATIONS (if applicable).

(c) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(d) BRIEF SUMMARY OF THE INVENTION.

(e) BRIEF DESCRIPTION OF THE DRAWING(S).

(f) DETAILED DESCRIPTION OF THE INVENTION.

(g) CLAIM OR CLAIMS (commencing on a separate sheet).

(h) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet and not more than 150 words).

4. The disclosure is objected to because of the following informalities:

a. Several section headings are missing in the application.

Art Unit: 2886

- b. The summary or any part of it should not be attributed to a claim as on page 3, line 13.

Appropriate correction is required.

Drawings

5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “**binder 14**” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-5 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Fujioka et al (JP 11101733).

8. Claims 1-5 are rejected because:

- A. Fujioka et al (Fujioka hereinafter) teaches of an optical reference standard 2 comprising an optical reference material such as food and agricultural products placed into an optical reference standard to provide a reference standard with desired spectral, mechanical and temporal characteristics.
- B. Fujioka does not explicitly teach of a reference material including a binder and a cereal formed into a matrix placed into an optical reference standard to provide a reference standard with desired spectral, mechanical and temporal characteristics.
- C. However, in view of Fujioka's teaching of a reference standard to hold food, and since it is well-known in the art that cereal and gelatin are food items, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have a binder and a cereal, which are food items, formed into a matrix, or any other combination of food items, such as oats, barley and wheat with various types of binding agents, to be

Art Unit: 2886

placed into an optical reference standard to provide a reference standard with desired spectral, mechanical and temporal characteristics.
